

AMAN DAFTARBAND

AKLUJ-413101, Maharashtra | [+91 8788177013](tel:+918788177013) | amandaftarband@gmail.com | [linkedin.com/in/amandaftarband/](https://www.linkedin.com/in/amandaftarband/)

Professional Summary

AI/Python Developer with experience building **2 full-stack AI applications** using **Python, LLM APIs, vector search, and real-time data pipelines**. Strong foundation in **SQL, Power BI, Data Analysis, API integration, and automation**, supported by an **8.15/10 CGPA in Computer Applications**. Skilled in developing analytics dashboards, automating workflows, handling large datasets, and delivering end-to-end software solutions through internships, industry simulations, and real-world projects.

Technical Skills

Programming and Data Handling: Python, SQL, JavaScript

Data Infrastructure and Engineering: MySQL, FastAPI, Flask

AI/ML: Groq API, FAISS, Prompt Engineering

Tools: Git, GitHub

Concepts: Data Structures, OOP, Problem Solving

Internship

Arlig Technologies – Python & Artificial Intelligence Intern | Vijayapura, Karnataka (Remote) |

Jan 2026 – Feb 2026

- Built 15+ Python-based problem-solving exercises and mini-projects across debugging, logic, and data-handling scenarios, by applying structured algorithmic and analytical thinking to real-world coding challenges.
- Implemented 5+ end-to-end machine learning workflows covering data preprocessing, model evaluation, and troubleshooting, by applying core AI/ML concepts using Python and industry-standard libraries.
- Completed 20+ internship assignments across AI and development tracks within fixed deadlines, applying structured problem-solving and prioritization techniques to maintain consistent delivery.

Projects

J.A.R.V.I.S — Smart Desktop Voice Assistant | Python | 2026

- Built a voice-controlled desktop assistant in Python integrating 10+ AI capabilities (voice recognition, image generation, web search), using FastAPI, Eel, and JavaScript for real-time desktop-to-backend communication.
- Reduced response latency by integrating Groq AI and FAISS vector storage for contextual memory, enabling near-instant, personalized responses instead of static query-response cycles.

AI Property Document Verification System | Python, React, Flask | 2026

- Built a full-stack property document verification platform using React, Flask, and SQLAlchemy, integrating OCR (Tesseract) and Groq LLaMA 3 70B to automate fraud detection across 7+ document types.
- Implemented dual confidence + fraud-risk scoring with JWT-based role access control (User, Officer, Admin), reducing manual review through automated PDF report generation.

Certifications

- Oracle Certified (2025)** - [Oracle Cloud Infrastructure 2025 Certified AI Foundation Associate \(2025\)](#)
- Coursera (2025)** - [Microsoft Azure SQL, Gen AI in Data Analytics](#).
- NVIDIA (2025)** - [Building LLM Applications with Prompt Engineering](#).

Education

Bachelor of Computer Applications (BCA)

Expected May 2026

Basaveshwar Science College, Bagalkot, Karnataka

CGPA: 8.15 / 10

Higher Secondary Education(Class XII)

March 2023

Shivshambho Arts and Science College, Kanher, Maharashtra

Percentage: 60%

Secondary Education(Class X)

March 2021

Sadashivrao Mane Vidyalaya, Akluj, Maharashtra

Percentage: 63%
